KYOCERA
MYPANEL

ADVANCED FUNCTIONALITY
IN THE PALM OF YOUR HAND.

PRINT, SCAN, COPY AND MORE...

With the popularity and capability of smartphones and tablets continuing to rise, the on-the-go worker is always looking for more convenient ways to complete everyday tasks such as sending an email, accessing documents stored on the cloud, or printing data from a mobile device. Rather than using the more traditional computer that ties users to a desk, smartphones and tablets allow you to consolidate many of these everyday tasks, into one familiar and easy-to-use device. With the Kyocera MyPanel business application on-the-go workers are provided an added level of flexibility and convenience for Kyocera device operation, all from the smartphone or tablet they are already using on a daily basis.

Available for Apple iOS, Android, and Windows Phone, MyPanel's intuitive layout enables you to operate select Kyocera MFPs or printers remotely to easily perform functions such as sending a document from your smartphone or tablet when connected to the same wireless network. Having advanced device functionality right at your fingertips simplifies document workflows and provides added convenience especially on non-touch screen Kyocera MFPs.

MYPANEL ALLOWS YOU TO LEVERAGE THE POWER OF YOUR KYOCERA DEVICE FROM THE CONVENIENCE OF YOUR SMARTPHONE OR TABLET.

Download the KYOCERA MyPanel app on your mobile device or tablet today!*

THE BENEFITS OF KYOCERA MYPANEL

- Advanced settings for complex jobs such as paper selection, density and continuous scan for copy and resolution, file format, and original size for scan, just to name a few
- Scan to email, shared folder, or cloud (Evernote, Dropbox, and OneDrive**) for immediate distribution and access to scanned documents
- Print from the cloud*** (Evernote, Dropbox, and OneDrive) for convenient, on-the-go access to hardcopy documents
- Create and save copy and scan workflows for one-touch access to apply settings
